The Features You Want ...

The Value You Need!

Available in the following colors:

Due to the printing process, colors shown are only approximations. Your salesman can show you samples with more accurate color.

Lifestyle's center-vent panel is a better solution for your skirting needs:

- Each full panel = 4.94 sq. inches of net free area per linear foot for 57.63 square inches or 0.4 sq. ft of net free area per panel; Exceeds most manufacturer's requirements* for open space under homes, meaning less chance of moisture problems & customer complaints.
- Eliminates calculations to find out how many vent panels are needed
- Saves time during installation - you don't have to waste time figuring out where to put regular vent panels

*Ventilation shall be provided for the crawl space at a minimum of one sq. foot of free area for every 150 sq. ft. of the home's floor area. Ventilation openings shall be placed at or near each corner of the home and as high as practicable. Openings shall be located to provide cross ventilation on at least two opposite sides. Where an acceptable ground vapor barrier is installed and one such ventilation opening is within 3 feet of each corner of the home, the total area of ventilation openings may be reduced to one sq. foot for every 1,500 sq. feet of the home's floor area. Where local codes have minimum ventilation requirements for crawl spaces, these requirements shall apply to homes with skirting and continuous foundations.
